Coordination and Photography was done primarily by
Sally Scott and Ann Haushild.

We thank all members of the study group for their financial
contributions to help us prepare this notebook

Introduction by Lila Nelson

When we banded together as a group from the Minnesota Weavers Guild interested in studying traditional Scandinavian weaving, we decided to concentrate on one technique at a time. Our first year focused on two types of tapestry weaving used for coverlets, billednev (pictorial tapestries) and aklaevev (geometric interlocked tapestries), and culminated in an exhibition for the Minnesota Federation Meeting at Iron World in 1996.

Our second area of study, krokbragd (Norwegian bound weave) and its variations, has proven so broad and challenging that we have not only compiled our results into this notebook; we have also decided to continue our experiments for another six-month period.

Traditional Norwegian boundweave was a three-harness point twill structure woven with floats on the obverse side only, producing a thick warm bed cover popular throughout rural Norway. Single point or double point patterns were basic, with surprising variations obtained from color changes in a constant three-step treadling order. The Swedish bunden rosengang (bound weave on rosepath) gradually was added to the Norwegian bound weave repertoire.

In the southern Norwegian province of Vest-Agder, a bound weave variant called "danskbrogd" was first publicized in 1983 by curator Katherine Bringsdal after an exhibition of locally owned coverlets in the historical museum at Kristiansand. These were of two types: one a pick-up technique in a light color done on a krokbragd structure but in a solid dark color, and the other a series of geometric picked-up patterns on a plain weave ground.

The first example here is a traditional krokbragd based on a coverlet in the collection of Vesterheim, Norwegian-American Museum, and woven by members of the study group as a demonstration during the exhibition "Norwegian Folk Art: The Migration of a Tradition" at the Minnesota Museum of Art in 1997. From that traditional beginning, we have gone on to the following variations:

- Bound weave using non-traditional materials such as cotton strips.
- Double point krokbragd with single point borders.
- Bound weave on rosepath.
- Rosepath on opposites.
- Twill variations to produce figures.
- Danskbrogd with picked-up patterns on a ground of continuing krokbragd designs.
- Danskbrogd on rosepath and point twill.
- Danskbrogd on a five harness twill threading to minimize pick-ups
- Danskbrogd on a six harness twill threading to further minimize pick-ups.
- A straight four-harness twill threading on which three-harness krokbragd can be woven as well as danskbrogd and bound or plain weave.
- Danskbrogd on plain weave combined with discontinuous wefts for small pattern units.
- Tapestry with some elements of danskbrogd for surface variation.

Danskbrogd Flower Garden

YARN INFORMATION (fiber, yarn size, color, brand, source)

Warp 10/3 linen

Weft Rauma Prydvevgarn

FINISHED SIZE

10" x 36"

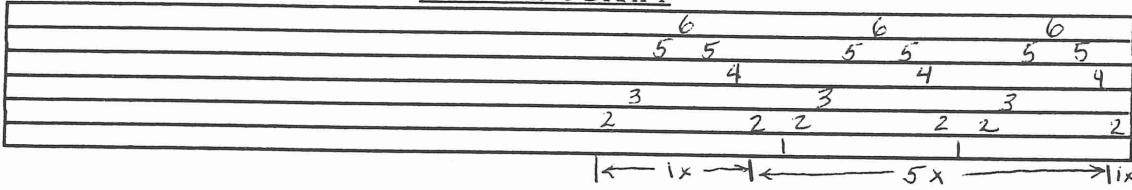

WEAVING INFORMATION:

sett 8 reed size 8 sley (e.g. doubled or skipped) Single
 warp ends/inch 8 weft picks/inch
 finishing details (e.g. 4 strand braided, 1/2 inch hemmed)

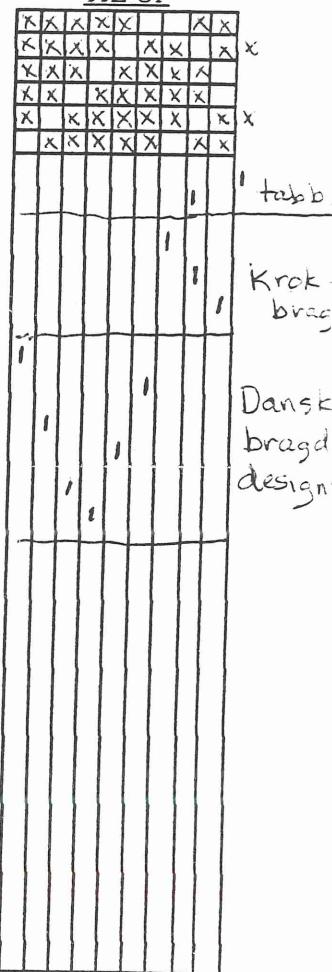

Techniques used

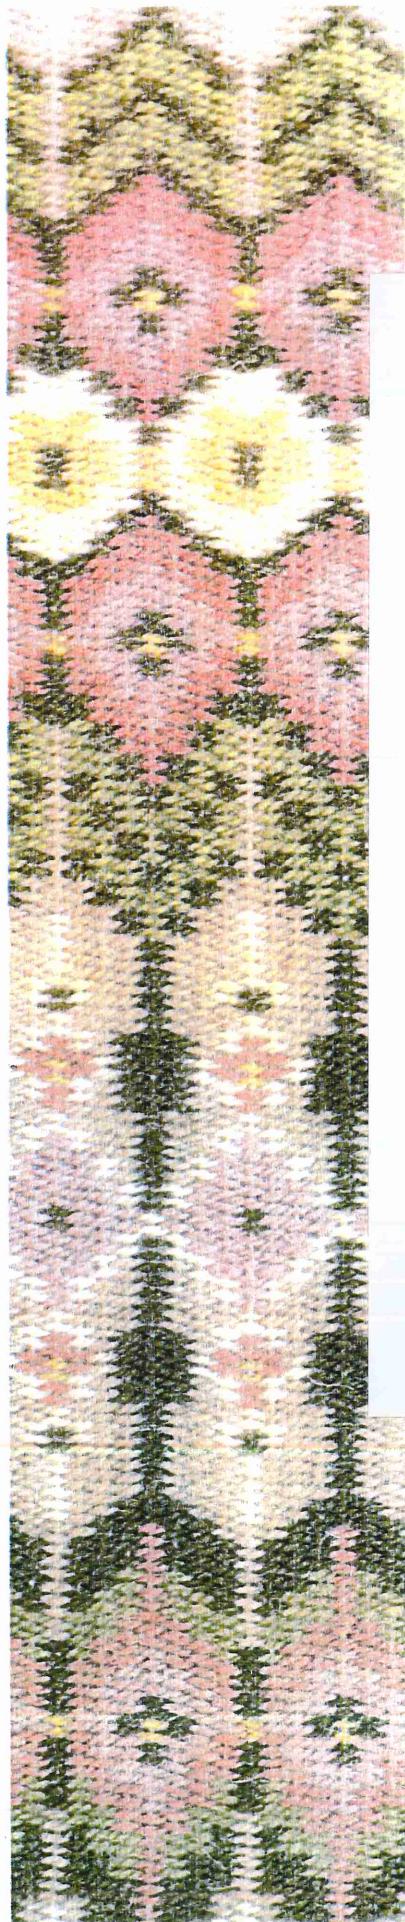

The 6 harness threading allowed this danskbrogd design to be done without using pickup. The draft was originally developed by Mary Temple. The design is original. The border idea came from a weaving in the Vesterheim collection.
